TECHNICAL SKILLS

- Languages
 - PHP 7.2, MySQL 5.2, Javascript, Nodejs
- Frameworks and Libraries
 - Symfony MVC Framework 4, PHPUnit, Express, React, jQuery

EXPERIENCE

Web Application Developer - Sonnys Enterprises, Tamarac, FL

"Building technology solutions for owners to manage their car wash business effectively"

April 2017 - Present

- Utilized Symfony 4 PHP framework, MySQL, and jQuery to contribute to various web applications
 - Administrative web platform - allows car wash owners to manage their wash
 - Implemented a SMS notification/marketing system with Twilio API and Beanstalk queue
 - Developed user permissions and change log (tracking user operations) for audit purposes
 - Built reports for business stakeholders to measure car wash business success
 - Ecommerce web platform - allows any consumer to purchase car wash products online
 - Integrated AWS S3 for style asset management (logos, CSS styles, etc.)
 - Integrated internal Java API to allow customers to manage their purchased products
 - Developed API to allow business stakeholders to build their own Ecommerce web platform
- Utilized React, Redux, ElectronJs, Nodejs to contribute to a desktop app to manage car wash queue
 - Contributed to Nodejs microservice API and integrated the desktop app with microservice for a simpler car wash queue management
 - Removed existing ReactJs form library and replaced with React hooks (e.g useState and useEffect)

PHP Developer - Web Benefits Design, Orlando, FL

June 2016 - April 2017

- Consumed third-party REST APIs (healthcare vendors, ticketing systems, etc.) to work with in-house application
- Rewrite legacy code using Symfony MVC 3.0 web components:
 - Separated PHP logic and view using Twig template engine
 - Used Symfony Form component to stream line form validation
- Utilized PHP, MySQL, and Gearman (job queue) to perform data migration tasks

EDUCATION

Nova Southeastern University

- B.S. in Information Technology - Graduated
